COUGARS SET FOR FIRST LEAGUE GAME TOMORROW

STATE GRANGE MEET NEARS

Visman Will Be Speaker;
County Group To Attend
Modesto Convention

The California State Grange will convene Tuesday, October 19, at Modesto and preparations have been made to have El Dorado County represented in the meeting.

C. H. MacLaughlin, an officer in the state Grange, will attend as will Carl Visman, Pomona Master, and Leo Springer, Harvey Jameson, Steve Lovejoy, Elmer Porini, Claiborne Trumley and Ira Cushman, all masters of subordinate Granges.

At the request of the federal Re-Settlement Administration, Mr. Visman will have an opportunity to explain to the state Grange the necessity for protecting the farmers against unreasonable coreclosures and excessive interest rates. Mr. Visman is an executive member of the state Farm Debt Adjustment Committee.

Grange officials announce that the Sixth Degree will be conferred on Wednesday evening, October 21, at 8 o'clock. Grangers who desire to be candidates for this degree should communicate with their Grange masters.

Winter Arrives In Mid-West

Snow In Iowa As Sleet Puts
Ice Blanket On Missouri
Streets Mercury Falls

KANSAS CITY, Mo., (UP)—Chilling blasts from the northeast today gave the central plains states their first taste of winter. Snow covered many sections of Iowa and came down in light flurries in Missouri and Kansas.

Temperatures dropped below freezing in Iowa where a low of 22 degrees was reported from Charles City and Iowa Falls. Kansas City had a minimum of 40 and several Kansas stations reported temperatures down near the freezing point.

A record was set at the St. Joseph, Mo., weather bureau when a sleet fall coated the streets with ice. Some apple orchards were damaged. It was the earliest snow or sleet in the records of the 27 year old weather office.

Kansas City forecasters had to go back to 1891 to find an earlier snow fall. On October 6, in that year, a snow fall was recorded. The snow in Kansas City and Kansas points came in occasional flurries and failed to remain on the ground.

BURGLARY GUILT ADMITTED IN SUPERIOR COURT; PROBATION ASKED

Darcy Potter, charged with two counts of burglary, entered pleas of guilty in Superior Court Thursday afternoon before Judge George H. Thompson and made application for probation.

The court referred the matter to the probation officer and named Monday afternoon as the time for receiving the report of the probation officer and for passing sentence.

Potter is charged with the theft of two rifles, one from the home of R. J. Schneebly, and one from the home of Andrew Smith.

USHER FINDS FORTUNE

TURIN, Italy, (UP)—Absent-minded customers have made Antonia Varra-vella, a Turin bank usher, a wealthy man. Two years ago he had his first stroke of luck when he found an envelope containing \$100,000. It was never claimed.

Mr. and Mrs. James L. Wilkinson and grand-daughter, Joanne Veerkamp, and Mrs. Alice Howe were visitors Friday at Sacramento.

The correspondence department of the University of California extension division announces that Helen Stevenson, No. 1 Garden St., Placerville, has enrolled as a correspondence student. Miss Stevenson is studying elementary composition.

DID IT RAIN!—Water stood four feet deep in some New Orleans streets, after two tropical storms merged and let loose 13½ inches of rain in 22 hours. Thousands were marooned in homes and offices.

SNOWLINE CAMP COMPLETES THIRD YEAR IN EL DORADO COUNTY

Unit Draws Enrollment From Five Central California Counties; Normal Strength 159 Men; \$500 Per Month Is Expended In Placerville For Supplies

On October 10, Camp Snowline, the CCC camp located about three miles above Camino, on the Tahoe Highway, completed its third year in this locality.

During this time, this camp has had the distinction of being occupied by the same company, the 999th Company. This is unusual, as most CCC camps are changed from time to time.

Camp Snowline was constructed in October, 1934, under the supervision of Captain Don M. Hoffman, of the Chemical Warfare Service, U. S. Army. Upon completion of the camp, Capt. Hoffman assumed command of the 999th Company, and has remained in that capacity since that date.

Camp Snowline draws its enrolled personnel from Sacramento, San Joaquin, El Dorado, Calaveras and Amador counties. These counties furnish approximately the following number of young men each six months: El Dorado, 4; Calaveras, 2; Amador, 2; San Joaquin, 45; and Sacramento, about 20. The normal full strength of this camp is about 159 men, but it has contained nearly 200 at times, and it is possible that by January, 1938, the company may be built up to a 200-man strength.

The age limits of Junior CCC Companies such as Snowline are now between 17 and 23. In the past a number of older men were usually carried with the company, but in a re-organization of the CCC September 30, 1937, these older men were released and no further enrollment of such men is now allowed. Next enrollment is October 20, 1937.

45 DAYS IN JAIL, YEAR'S PROBATION, SENTENCE ON CHECK CHARGE

Theo Williams, who had pleaded guilty to a charge of issuing worthless checks, was sentenced to serve 45 days in jail on Thursday when he appeared before Judge George H. Thompson in Superior Court.

Williams' application for probation was granted, conditioned that he make full restitution for the worthless checks written.

The accused informed the court that he has contracted to do certain work which will be lost to him if he is immediately incarcerated and the court agreed that the sentence might be suspended until January 2 if immediate restitution on the checks is made.

At mid-morning Friday Williams was still in jail.

He had been arrested on the complaint of L. T. Butts, who alleged Williams issued him two checks, one for \$40 and one for \$15, which were returned by the bank with notice that the account had been closed.

National Air Races Yield \$60,000

CLEVELAND, (UP)—Profits for the 1937 National Air Races, recently closed, were reported here by John C. McHannan director, as totaling \$60,000.

The four-day show brought a total attendance of 170,717, netting \$262,548 for ticket sales.

Warren Benson was a Friday caller from Summit district.

MASONIC FRIENDS AMONG P. G. & E. WORKERS HONOR JOHNSONS

Employees of the Pacific Gas and Electric Company in the El Dorado County district who have been associated with Mr. and Mrs. J. R. Johnson in Masonic and affiliated membership, will give a farewell party in their honor this evening.

Mr. and Mrs. Johnson have recently moved from Placerville to Auburn where, on January 1, Mr. Johnson is to become division manager for the power company.

The occasion this evening will begin with a dinner at Hotel Raffles, followed by entertainment and a social evening at the home of Mr. and Mrs. J. G. Leonard, on Coloma Street.

Mr. Johnson, during his residence in Placerville, has been an active member of various Masonic bodies and is a past patron of Fallen Leaf Chapter No. 90, O. E. S. of which Mrs. Johnson has been an active member.

Preparations also are being made by the P. G. & E. employees for a farewell party for Mr. and Mrs. Johnson which will also be a reception for the new district manager and his wife, Mr. and Mrs. Roy G. Strum, to be held at the Shakespeare clubhouse on the evening of October 27.

W. F. Klare and son, George, came to town in the rain Thursday from Fairplay.

Oddities In The Day's News By UNITED PRESS

HE'S EVEN

LOS ANGELES, (UP)—It cost Pat Truco \$15 to get his son, Lawrence, "even" with a neighbor's children. Police charged Pat with battery after they said he entered the home of Mrs. Laura Gage and slapped her several children because Lawrence said they slapped him.

WHAT PRICE GLORY?

SANTA BARBARA, (UP)—Howard Yaeger, Santa Barbara State college halfback, can earn \$10 by scoring a couple of touchdowns against Redlands tonight. Police Judge Harsh ordered Yaeger to pay a \$10 fine for speeding, but allowed that two touchdowns would settle the bill.

WEIGHTY PROBLEM

NEW YORK, (UP)—Nine policemen, equipped with crow bars and emergency belts, removed Mrs. Appolonea Becker, 44, in a truck to a hospital for treatment. She weighs approximately 500 pounds.

McAdoo Visits Sacramento

County Democrats Attend Reception Thursday Night For Junior Senator

SACRAMENTO, (UP)—U. S. Senator William Gibbs McAdoo moved into the northern San Joaquin Valley today on statewide tour, preparing for the 1938 campaign which he said would find "Democrats sweeping California."

His first stop was Stockton. Thereafter he was to visit Modesto, Merced, Madera and Fresno, proceeding from Fresno to Santa Barbara by airplane. He announced last night he had cancelled a projected visit to Redding because of "insufficient time due to the congressional call."

McAdoo voiced whole-hearted approval of the special session.

"What's the difference? He asked reporters. "It simply means we'll get away earlier in the spring. All the matters would come up six weeks later anyway."

Among El Dorado County Democrats who were at Sacramento Thursday night to attend a reception for Senator McAdoo were T. G. Patton, Postmaster Joseph Scherrer, H. E. Dilling, A. C. Winkelman and George Besse.

JACKSON EXPECTED TO OPEN WITH PASSING ATTACK

Kick-Off At 2:30 O'Clock At Marcus P. Bennett, Jr., Memorial Park; Flashing Tiger Backfield May Prove Problem For El Dorado County's Well-Developed Power Boys

\$3,591 FOR COUNTY IN LIQUOR FEES

Placerville's Share In Six-Month Apportionment Is \$658.75, Board Reveals

SACRAMENTO—Allocations of \$91,447,259.75 to cities and counties as their share of liquor fees for licenses issued during the first six months of 1937, was announced today by R. E. Collins, chairman of the state board of equalization.

The allocation represents 50 per cent of the total fees earned during the first half of the year, totaling \$2,894,519.51, the state's share of which goes into the general fund.

On the basis of actual licenses issued, El Dorado County will receive a total of \$3,591.87, of which \$2,933.12 will go to the unincorporated areas and \$658.75 to Placerville.

The change in the law to provide for allocations twice a year instead of annually was made at the request of members of the board of equalization so that these funds would not remain idle for such a long period. Payments of the various allocations will be made in the near future, officials said.

In pointing out that these funds are collected entirely by the state and represent income derived exclusively from liquor licenses, Collins called attention to a recent opinion of Attorney General U. S. Webb in which it was held that a proper expenditure of this money would be the fulfilling of the obligation imposed upon cities and counties by section 66.5 of the Alcoholic Beverage Control Act which provides as follows:

"It is hereby made the duty of every peace officer and every district attorney in this state to enforce the provisions of this act, and to inform against and diligently prosecute persons whom they have reasonable cause to believe offenders against the provisions hereof. Every such officer refusing or neglecting to do so is guilty of a misdemeanor."

SHAKESPEARE MEMBERS PLAN PROGRAM DAY ON TUESDAY

The meeting of the Shakespeare Club on Tuesday, October 19, will be a program day and Mrs. Robert Carpenter is in charge of the plans for the day.

Attention is also called to the Tri-county Federation meeting, to be held at Roseville Friday, October 22. The state president will be the speaker and it is urged that as many as possible make plans to attend.

The club's annual luncheon was held Tuesday of this week and a very fine attendance was noted. Mrs. Hattie Amstalden, president, introduced the speaker of the day, Dr. George M. Uhl, of the state health department.

Miss Antoinette Tomisatti, of Sacramento, gave a group of fine piano selections and Rudolpho Caffaro, of Sacramento, responded to many encores his fine, rich tenor voice. The club choral gave a group of songs.

Mrs. Marie Wheeler Rites Friday

The funeral services for Mrs. Marie Wheeler, who died Wednesday at her residence in the Carmichael district, near Sacramento, were held at the latter city on Friday morning under auspices of El Camino Chapter, Order of Eastern Star. Interment was at Odd Fellows' Lawn.

This is according to word received by members of Fallen Leaf Chapter, No. 90, O. E. S. of which Mrs. Wheeler and her husband, William Wheeler, were members.

The Wheelers resided in Placerville about twelve years ago, Mr. Wheeler being employed in the lumber industry.

El Dorado County high school's Cougars start their inter-scholastic league football schedule Saturday afternoon at Marcus P. Bennett, Jr. Memorial Park against the Jackson high school Tigers. The kick-off is at 2:30 o'clock.

Since it is the first league game for both clubs, there is little on which to base a comparison of their respective strength other than results of their game with the Preston School of Industry eleven.

On this basis, the Cougars appear to have an advantage, for they ran over Preston 16 to 0 while the Tigers bowed before the Preston eleven, 16 to 6.

"The figures would indicate that we are about thirty points stronger than Jackson, but figures sometimes lie and this is one time when we are suspicious," declared Coach L. A. Brown Friday morning.

"Jackson is always a hard team for us and we are taking no chances in this first league game of the year. The Tigers have a strong line. Their boys are not quite as heavy as the Cougar linemen, but their backfield is plenty fast."

Expecting the Tigers to open with an aerial attack, the Cougars have devoted their practices during the past week to perfecting an aerial defense.

Cougar supporters feel that since the team was able to hold the Placer Junior College reserves to a 7 to 0 score last week, their line is well prepared to withstand the Jackson attack so long as it is made on the ground.

What will happen when Jackson takes to the air remains to be answered.

Youths Facing U. S. Charges

Sacramento "Boy Bandits" May Be Turned Over To Juvenile Authorities

PHOENIX, ARIZ., (UP)—Melvin Bonds and Alfred J. Smith, both 16, of Sacramento, Calif., were held in city jail under \$1,500 bond each today awaiting federal grand jury action on the charges of transporting a stolen automobile car from California to Arizona.

The two daring "boy bandits" who wrote of their exploits in a "crime chronicle," assertedly stole nine cars in California and two in Arizona and robbed stores at Casa Grande and Gila Bend, Ariz. The car they allegedly brought into this state was stolen at El Centro, Calif.

Because they are juveniles, B. E. Sackett, Arizona chief of the federal bureau of investigation, said the youths probably will be returned to Sacramento for prosecution by California Authorities.

FEELING THE PULL

It's Cranberry Time; They Spice Your October Meals

By JUDITH WILSON

AT LAST we know that Fall is really here. Bright red cranberries are on the stands of every grocer or fancy fruit dealer. They remind us, not only of the good things that can be made from the cranberries themselves, but of savory stuffings, tasty squash and sweet potato dishes that will soon join them to accompany richly browned roast turkeys, duckling and fowl.

DINNERS
Roast Loin of Pork
Cranberry-Orange Relish
Sweet Potatoes on Pineapple Slices
Buttered Brussels Sprouts
Date Torte with Whipped Cream
Coffee

Cranberry Juice Cocktail
Roast Turkey with Italian Stuffing
Mashed Potatoes Brown Gravy
Buttered Broccoli
Endive Salad, Beet Dressing
Jelly Roll Coffee

There is something thrilling about planning October's company dinners when you can include cranberries and other colorful fruits and vegetables.

CRANBERRY COCKTAIL
6 cups cranberries
6 cups water
1½ cups sugar
Spice to taste

Wash and pick over the berries. Add the water, cover and cook until the skins pop open. Strain through a cheesecloth. Heat the juice to the boiling point, add the sugar and boil about 2 minutes. Chill thoroughly before serving. I like to shake the juice in a cocktail shaker with a dash of cinna-

mon and allspice before serving, although this is a matter of taste. The remaining cranberry pulp can be pressed through a sieve, more sugar added and then cooked to the jelly stage. Pour into small molds to harden.

SWEET POTATOES AND PINEAPPLE
6 slices pineapple
3 tablespoons butter
8 thick slices boiled sweet potatoes
4 tablespoons pineapple juice
Salt, pepper, cinnamon
Arrange the pineapple slices on a glass baking dish, with the slices of cooked sweet potato on top. Dot with butter, sprinkle with the seasonings and pour in the pineapple juice. Cook under a broiler 10 minutes or bake in a very hot oven until the potatoes are partly browned and the pineapple well heated.

ITALIAN STUFFING
½ pound link sausage
1 pint chestnuts
2 tablespoons butter
8 large prunes
4 pears
Turkey or chicken giblets
Salt, pepper
Small glass wine flavoring
Parboil the sausages and let them cool. Remove from the casings and crumble. Wash the chestnuts, drop in boiling water a few minutes to soften the shells. Peel, being sure to remove the inner skin. Then boil the chestnuts in fresh salted water until tender. Slice. Put into a saucepan with the butter, the parboiled and coarsely chopped heart, gizzard and liver of the fowl, the prunes that have been soaked, pitted and chopped and the peeled and chopped pears.

MILADY'S FEET LARGER, STILL GROWING, SAYS SHOE MAN

RALEIGH, N. C., (UP)—Milady's foot, once distinctive and smart only if appearing ultra-small, has grown an average of four sizes in the past two

decades and is growing still. Furthermore, modern well-dressed women no longer object to wearing the larger-sized shoes.

They ask for them. They have renounced the tiny foot as a criterion of feminine loveliness and are going in for comfort in their footwear, according to Roscoe Griffin, president of a North Carolina shoe store chain.

"The average size of women's shoes 20 years ago was a 4," Griffin said. "Today it is an 8."

Women's feet will continue to grow larger for several years, Griffin believes, now that shoes actually fit and permit proper pedal development.

This & That

By The Tattletale

How long has it been since you've paid a visit to the county library. Those of us who visit it once or twice a week realize what a grand thing it is and how badly books are needed. Students use it, teachers use it, and all types of individual readers borrow books. It is too bad we can't build a complete California section there—especially since so many books have been written about this area. And as they have the classics. "We read old books for their excellence, and new books to keep up with the spirit of the times."

We bought an eastern paper just out of curiosity the other day and figure we got our money's worth out of this one statement—a foreign dispatch from Shanghai: "The Japanese army's inability to advance as scheduled at Shanghai is said to be the result of the defenders' lack of knowledge of military tactics. They do not know when they are outmaneuvered or whipped." Ignorant cusses, those Chinese.

Speaking of China, this war has brought out an interesting, militant spirit in the residents of San Francisco's Chinatown. There is always a large group standing outside the Chinese newspaper office reading the latest dispatches from the war zone and you can hardly walk a block without being accosted by some small boy wanting to shine your shoes for a dime or some small girl selling flowers. The money thus earned is sent to the old country to aid in its defense. Many merchants display printed cards urging you not to buy Japanese goods.

The prospect of a Japanese boycott is undoubtedly approaching reality, the some fair method must be first worked out to insure such industries as the cotton and silk manufacturers that they will not have to bear the brunt of the load. Why punish the textile manufacturers and throw their workers out of jobs? Yet an immediate boycott (and it must be immediate to be effective) is highly desirable for the peace of the world—far more so than a war. Lo, the price of peace!

We dropped over to the nearly completed Youth Hall yesterday and found it—nearly completed. If the Veterans organization ever get in that long-promised fireplace it will be ready for use. Whoever designed that building certainly knew the "youth of our land," and built it accordingly. The walls are of hard, solid logs; the floor of cement. (Iron bars were considered for the windows but were rejected because—well, you know) The rear of the building is partitioned off into small rooms in which the various organizations may store their belongings or small groups can meet while others use the main room. The two Boy Scout troops will meet there as well as the Cub Pack, the Sons of the Legion, and probably the to-be-formed Girl Scout troop—the announcement of which shall be published in this paper early next week. And speaking of service to our Placerville youths, don't you think the Lions Club finance committee and contributors deserve a big hand for raising over five-hundred dollars toward the Boy Scout fund? We do.

It isn't hard to guess what the chief moan will be from Governor Merriam's opposition in the forthcoming campaign—taxes. Though we haven't the figures regarding what the raise in the tax rate has been throughout the state, we do know what the man who earns fourteen hundred dollars a year (a little above the average income) pays now. It amounts to over sixty one dollars and is broken down as follows: State sales tax, \$22.59; liquor tax, \$2.13; inheritance tax, \$4.49; gas tax and license, \$18.72; gross receipts tax, \$13. Of course, at the end of the fiscal year there will be a thirty million dollar surplus to keep the state out of the red (we hope it will be thus used) so perhaps we can look for a reduction then. It won't be long before that election time rolls around.

NEW MASS FLIGHT TO COCO SOLO SET FOR DECEMBER

SAN DIEGO, (UP)—The second mass, non-stop flight from San Diego to Coco Solo, Canal Zone, this year, will be undertaken by the Navy "early in December," Rear Admiral E. J. King, commander of scouting force aircraft announced today.

The December hop to Panama will mark the sixth mass, long-distance flights to be made by the navy since last January. Two previous flights were made to Hawaii, two to Seattle,

George Pontious was a Friday morning caller from Coloma.

Philip Mocetini was a caller on Friday from Latrobe.

and one to Panama.

In making the announcement it was stressed, as usual, that the more than 3,000-mile hop would be a "routine transfer" of personnel and planes.

Twelve of the latest type bombers, recently transferred to the scouting force where they assumed all the functions formerly performed by destroyers, will make the flight to their permanent base in the Canal Zone.

Lieut. Comdr. B. E. Grow will command the squadron.

Insulin Helps Relieve Dementia Praecox

CHICAGO, (UP)—Experiments in use of insulin to restore sanity of dementia praecox victims were reported in the journal of the American Medical Association today by five physicians.

The physicians described experiments on 17 men and women 13 to 42 years old.

"Two have recovered and five have shown themselves capable of being at home for varying periods, the doctors reported. "Five showed no improvement."

\$35,000 DAMAGES ASKED BY ELECTRICIAN FOR FALSE ARREST

Ray Gordon, electrician, has filed suit in the Sacramento County Superior Court claiming damages of \$35,000 against D. C. Poulsen and David E. Kellar, charging false arrest.

Gordon was taken into custody on a complaint filed in this county charging him with issuing a fictitious check.

Subsequent investigation showed local officials that the check in question had been post-dated when issued, with the full knowledge of all parties and apparently at the insistence of the complaining witness.

Since the courts have repeatedly held that a post-dated check is, in effect, a promissory note, the charges against Gordon were withdrawn.

Gordon indicated at the time of his release that he probably would bring the suit now filed.

Garter Snake Accused As Fish Killer

LANSING, Mich., (U)—Research assistants studying fish predators have exposed two "villains" generally believed to be harmless.

They are the gartersnake, long renowned as a killer of injurious insects, and the painted turtle, known as a destroyer of mosquito larvae.

Students' observations indicate that the gartersnake may be as great a liability near a hatchery or trout stream as a watersnake and that the painted turtle is as much an enemy of young fish as the leatherback, Blanding's, and stinkpot turtles.

Directors of the research project emphasized that preliminary evidence is not altogether conclusive and said further studies would be undertaken.

"PROMISED LAND" DRY
JONESBORO, Ark. (U)—Promised Land imbibers have had their promise broken. Recently the last beer permit in Promised Land, a township near here, was revoked.

CONTRA COSTA CANAL PROJECT MAY BE STARTED EARLY NEXT WEEK; FIRST CONTRACT ON PROJECT FOR \$120,000; UNIT OF CENTRAL VALLEY DEVELOPMENT

SAN FRANCISCO, (U)—Construction of the Contra Costa canal, first phase of the huge \$170,000,000 Central Valley Water and Power Project, probably will start early next week, G. F. Mellin, federal project official and director of right of ways, said today.

The final legal obstacle to actual construction work was cleared when checks were deposited in federal court here to reimburse two owners of condemned property. One check was for \$13,239 for Mrs. Ethel Emerson, the second for \$9,584 for Jos. Luiz. They are entitled to sue for larger amounts if they choose.

The construction firm of Hass-droughty, Jones, Marshall & Stacy has placed materials and machines on the Luiz property and is ready to begin work. The first contract is for \$120,000.

The Contra Costa conduit is an integral link in the federal bureau of reclamation's conservation enterprise designed to regulate the water resources of the Sacramento and San Joaquin rivers for the benefit of a \$2,000,000,000 agricultural area.

Key unit is the giant Shasta reservoir which will be operated to stabilize the Sacramento river, thereby diminishing floods in the spring, eliminate low fall flow, permit year-round navigation to Red Bluff, and afford a fresh water supply for delivery to the Contra Costa canal and the San Joaquin pumping system.

The Contra Costa conduit will extend from Luiz' property, five miles east of Oakley, near Rock Slough, a point near Martinez. Five pumping plants will be built along the conduit to provide easy access to water for irrigation and other purposes.

The San Joaquin pumping system, starting near Tracy, will carry Sacramento river water up the lower San Joaquin valley as far as Mendota to replace San Joaquin river water which will be conserved at Friant dam, near Fresno.

From this reservoir, irrigation water will be diverted northerly 41 miles, via the Madera canal, to Madera county, and southerly 157 miles via the Friant-Kern canal to parts of Fresno, Tulare and Kern counties.

Already preliminary work has begun on the Shasta dam site in the Sacramento river canyon. More than three miles of tunnels, shafts and drill holes have been driven to determine adequacy of the foundation.

Buick Coils Its Rear Springs

COIL SPRING Rear suspension, one of the major automotive developments of the year, has been pioneered by Buick on all four lines of cars for 1938. A feature exclusive to this make, rear coil suspension combines with airplane type shock absorbers to provide greatly improved riding and steering qualities. Photo shows the spring and shock absorber hook-up on the left rear wheel of the 1938 Buick chassis.

This new Buick is now on display at Frey's Garage.

"MISSING LINK" FOUND IN UTAH CAVE, SAY SCIENTISTS

WASHINGTON, (U)—The discovery of an American "missing link" is an almost forgotten cave near Great Salt Lake was announced today by Dr. Julian H. Steward, Smithsonian Institute archeologist.

The primitive skeleton may be the oldest ever found on this continent, Steward said in a Smithsonian report. The remains were those of a youngster less than a year old whose body was buried in the graven of the cave from 5000 to 12,000 years ago, he said.

The bones were so immature that even modern experts could not ascertain the sex of the baby.

The skeleton is a true "missing link" in that it fills a blank in the history of America about which archeologists previously have always had to guess. It represents a culture between the basket makers, the last peoples of which science has a fairly complete picture, and the so-called Folsom men.

Folsom men, the oldest known Americans, are noted for their unique double chipped arrow heads. Despite a decade of the most vigorous searching, scientists have been unable to find any of their skeletons.

Painter Turns Talent To Repairing Steins

NEW ORLEANS, (U)—In a small workshop in the rear of his home Frank Galliano, former boxer, painter and soldier, daily works at an unusual occupation — mending broken beer steins.

By means of a specially prepared cement and an ingenious filling machine fashioned from a pair of shears and a few boards, Galliano and his wife, Anna, turn out weekly approximately 200 restored beer glasses.

Train Your Eyebrows in Natural, Graceful Arch

By JACQUELINE HUNT

NO SELF-IMPROVEMENT program is complete until you take a look at your eyebrows and see what you can do to improve them. They are the most important accent to your face, but frequently you abuse them.

To be lovely they should be properly proportioned, silky and healthy in appearance. To be lovely they should be properly proportioned, silky and healthy in appearance. To be lovely they should be properly proportioned, silky and healthy in appearance.

Brushing every night and an application of oil or petroleum jelly will encourage the growth of your brows and lashes and will give them a lovely natural luster. When your brows are naturally healthy and lovely, you can experiment with eye make-up to make this feature even more alluring.

A touch of make-up deftly applied makes the eyelashes seem longer and darker and gives more accent to the brows. The eyes then appear larger, deeper and more expressive. A delicate blending of eye shadow in one of the exotic new iridescent colors helps to make

even a plain face more appealing and romantic.

Choose shades of eye make-up that harmonize with the color of the eyes. If your eyes are blue, an iridescent blue shadow will make them seem darker and lovelier; blue-green eye shadow is flattering both to hazel and brown eyes, but the truly black-eyed girl should use a blue-violet shade; green shadow is best for green eyes.

Placing the eye shadow is nearly as important as choosing the right shade. If the eyes are close together, carry the shadow out towards the temples. Do not use any near the inner corners of the lids.

To make the eyes appear more languorous, concentrate the shadow near the lashes, blending lightly over the rest of the eyelid. Taper off to a thin edge of color before reaching the eyebrows. And blend out beyond the corners of the eyes to add length.

If the eyes are so far apart as to be conspicuous, you can make them appear more nicely proportioned by accenting the inner part of the eyebrows with eyebrow pencil, and by shading the part of the lids near the nose. Carry the color out along the lashes, but only part of the way across the lids farther up.

For deepset eyes, put your eye shadow high near the eyebrows instead of along the lashes. Soft, grayed shades of eye shadow are best.

For eyes that bulge, on the other hand, apply shadow near the lashes and use a different color near the eyebrows and out toward the temples.

Eyes with droopy lids become mysterious and lovely if you blend your shadow near the lashes and upward and out from the center of the eyelid all the way to the ends of the eyebrows.

Snowline Camp 3 Years Old

(Continued from Page 1)

are carried on by the young men in the organization, including the cooking and messing, handling of all supplies, hospital attendance, and other related activities.

The young men are taken into the company, immunized against typhoid, vaccinated, and given a complete issue of work and dress clothing, as well as toilet articles, boots, raincoats, over-shoes, and work equipment. The enrollment period is for a duration of six months, and enrollees may re-enroll, until a total of eighteen months has been served. They are then required to be discharged. Men who obtain better employment on the outside, are also released from camp upon presentation of bona fide evidence. Upon release from camp, the men are furnished transportation to the place of their enrollment.

A camp surgeon, who is also an Army officer, is stationed in the camp at all times. At this time the camp is attended by Capt. A. W. Macpherson, Med-Res. A hospital, complete with ample facilities and a ward of eight beds is available at all times.

The young men are given mandatory courses in citizenship, first aid, safety and Americanism, and a complete educational department is also available in the camp. Each camp has an educational director, the present director at Snowline being Mr. Lloyd Vye, B. S., who has been in charge of education at Snowline for over a year. A well-equipped vocational shop, library, photo laboratory, and class rooms are provided. Classes in typing, diesel engines, aeronautics, carpentry, woodworking, leadership, and many academic subjects are taught.

Supplies for Camp Snowline are obtained from contractors who must

REBEL—Bruno Mussolini, 20, son of Premier Mussolini of Italy, reported in active service as a pilot for General Francisco Franco's insurgent forces in Spain. He is accompanied by Italy's crack squadron of 23 bombers and the flower of II Duce's airmen. They were believed already to have raided the Loyalist capital of Valencia.

comply with all Army, as well as State specifications and standards of quality and grading. All meat products must bear the stamp of a triple inspection, and bread and milk is obtained locally from Army inspected sources in Placerville for the operation of this camp. Approximately \$500 per month is expended in Placerville.

Enrollees are paid each month by the Company Commander, and receive from \$5 to \$8 at the payable. The balance of their \$30 per month is sent home as an allotment to their dependents, or in case they have no dependents, they are required to make a deposit to themselves with the Finance Officer of the Army, which is paid them upon their release from the CCC service. A small canteen is maintained in the camp, the profits from which are used to provide in some measure for the benefit of the company. Radios, pool tables, furniture and other items for the enjoyment of the men are purchased from the funds of the canteen. A considerable amount of men's pay is also expended in Placerville.

Records over the past three years at Snowline show that the average enrollee comes into the company weighing about 130 pounds, and when he is discharged about 9 months later he is about 19 pounds heavier, or weighs on an average of about 150.

The work projects of Camp Snowline are under the technical supervision of the U. S. Forest Service, and the direct operation of the office of Edwin F. Smith, Forest Supervisor of the Eldorado National Forest. A project superintendent, and a force of some twelve work foremen, including surveyors, forest technicians, and construction bosses, supervise the work of the men of the company in the field. A five day week is in force and eight hours each day are put in by the young men. Since the inception of Company 999 at Snowline, a large aggregate of important forest and recreational improvements have been accomplished in the local Forest. Fire suppression is also a major activity of all CCC camps, and the record of the past year is one of the best ever experienced in the county. Forest fires are gradually being reduced as a menace each year that the CCC goes on, as it is possible with this corps to place a large group of active young fire fighters on a blaze in very short order.

It is expected that Camp Snowline will remain at its present location indefinitely, and continue the excellent work now being carried on in this county. The Company Commander extends at all time, an invitation to all persons to inspect the camp, and view the plant setup in use there.

Hulbert Horn Assigned To Webber Bridge

Hulbert Horn, son of the late Mrs. Maude Horn, of Georgetown and an "El Dorado County boy," has been named engineer in charge for the state on the erection of the new bridge across Webber Creek, for which contract was recently let to the Campbell Construction Company.

Hulbert has been an engineer with the state Department of Public Works for several years, working principally in the southern part of the state and was, within recent weeks, transferred to the Sacramento district.

Mr. Horn came to Placerville Friday to take charge of the work.

The Camino P. T. A. announces that it will hold its first card party of the new series on Friday evening, Oct. 29th, at the school auditorium. Good prizes and delicious refreshments and a good time for all are promised by the committee in charge. At the end of the series of four card parties, of which this is the first, a grand prize of a beautiful blanket is offered.

1938 Models To Be Shown At
Court Garage Saturday;
Many Improvements

Recently Philip Frost and Mervyn Sumner, of the Placerville Automobile Company, agency for Dodge and Plymouth cars for this county, were in San Francisco at a preview showing of the new 1938 models.

They also attended a conference called by officials of the Dodge Division of Chrysler Corporation, which included a large gathering of dealers and dealer representatives.

"The dual purpose of the meeting was to review the 1937 activities of Dodge dealers operating in the territory and to discuss sales and service plans for 1938 in advance of the automobile show in San Francisco, and our own showing of the 1938 models in Placerville, which has been set for Saturday, Oct. 16," says Frost.

"Announcement description of the 1938 Dodge passenger car models will make interesting reading to the many followers of this popular make, especially in view of the fact that the new line, offering ten body selections, incorporates some forty-seven progressive improvements affecting appearance, comfort and performance. Coupes come in three styles—business, rumble seat and convertible. Sedan and touring sedan models include two and four-door closed types and a convertible style."

There also are two 132-inch wheel-base vehicles—rated as 7-passenger sedan and 7-passenger limousine, but in reality accommodating eight passengers.

"Changes and improvements distinguishing the 1938 models from their immediate predecessors are found in nearly every major element of the new series—in the power plant, transmission, brakes, steering mechanism, clutch, wheels and other components. Outstanding engineering features such as floating power and other engine details, silenced all-steel safety bodies, hydraulic brakes, hypoid rear axle, and a variety of automatic operating features are either retained or used with modifications. Entirely new are such units as the radiator shell and grilles by which the head-on appearance of

MODEL OF BLACK DEATH—Used for educational purposes at the Los Angeles County Health exhibit at Whittier, Cal., is this replica of the venomous black widow spider, 360 times as large as a live specimen. Miss Barbara Todd shows how its movable antennae and swivel legs give it a life-like appearance. Hundreds have inspected it and will avoid the "black death."

Mrs. Mary A. Vye, of Pasadena, who has spent two weeks here with her son, Lloyd Vye and family, left Friday morning for her home. She was accompanied home by her grandson, Lloyd Vye, who will visit there for a while. Mrs. Lloyd Vye, who has been a Sutter hospital patient for an appendectomy, has returned home and is now convalescent.

The new cars is beautified." New also are hood louvers, fenders and their mountings, windshield, instrument panel, seat adjustment, head lamps, door and luggage compartment locks, brake drums, engine impulse neutralizer, muffler, clutch facings, clutch baffle and release bearings, generator and interior treatment.

HUNT "MONSTER"

MORRISON, Ill. (U)—A posse of "vigilantes" is searching for a "huge wild animal" which has so far eluded them and left only a set of large tracks to disturb Whiteside county farmers.

City Attorney and Mrs. Thomas Maul returned Thursday evening from a two-day visit at the Bay District where Mr. Maul attended to duties as District Governor of Lions.

Ralph Eason, northern California head of the Agricultural Conservation program, was a caller in Placerville on Friday, conferring with B. E. Haslem, county association secretary.

Upstairs Over Morgan's Pharmacy

CHEMISTRY MAY PROLONG LIFE OF MAN INDEFINITELY

NEW YORK, (U)—Man's inevitable decline toward old age and death may be halted in the future by chemicals as a result of discoveries announced today by Dr. William Debernier MacNider, of the University of North Carolina's school of medicine.

He told Columbia University scientists and professors that experiments with animals indicated that old age is the result of the body changing its tissues to build up defenses against accumulating poisons, rather than a "natural" loss of vitality through time.

Fur Seal Increase In Alaska Is Noted

WASHINGTON, (U)—The bureau of fisheries announced today that a census taken August 10 showed that the fur seal population of Alaska was 1,839,110, an increase of 1,709,110 since 1910.

Expressing satisfaction with the seal birth rate, the bureau disclosed that during the last 26 years 768,792 fur seals—surplus male animals—were killed for their skins.

BOX MAKER SWIFT

SYDNEY, (U)—John Rose, who works a nail-driving machine in a co-operative factory at Byron Bay, claims both the speed and the endurance records for box-making. He has made 5,000,000 boxes in 36 years. And three times, for a bet, he made 60 boxes in an hour.

CURBS MIDDLEMEN

BUDAPEST, (U)—To protect peasants against high prices of unscrupulous middlemen, the government has instituted the practice of posting egg prices daily in the nation's postoffices.
